

IMPROVE PERFORMANCE OF YOUR WAREHOUSE OPERATIONS

InoWare: no more chaos in your warehouse

InoWare is a solution to monitor the flow of products through chaotic warehouses in heavy industry. A collection of networked edge devices with state-of-the-art tracking software, InoWare delivers real-time position of any tracked product in the warehouse.

How InoWare works

Warehouse observed by cameras and processed by InoWare

Data collected into single source with automated analysis

Actionable insights for multiple stakeholders in interactive dashboards

What InoWare brings you

Financial effectiveness

No CAPEX need, early benefits, can increase return on assets by 5-50%

Fast deployment

The hardware component can be installed in several hours, depending on the size of the warehouse

Cutting edge

Using latest computer vision and machine learning technologies

Modularity

Can be implemented along with other OT/IT solutions

Security

Cloud or on premise storage with no sensitive data outside the plant

Flexibility

Easy to modify for a particular use in a factory

Timeliness

Real-time monitoring of product positions, regular updates

Simplicity

Interactive web-based dashboards for all stakeholders involved in warehouse operations
